NAVA AI

LEGAL / 01

Terms and Conditions

Responsible use for the NAVA AI preview installer and Windows assistant.

Preview release

NAVA AI is an accessibility preview. It may contain incomplete integrations or compatibility limits. Keep normal backups and do not depend on it for safety-critical, financial, medical, or emergency tasks.

1. About NAVA AI

NAVA AI combines offline speech recognition, native Windows controls, smart-grid labels, and direct application integrations to make everyday computer tasks more reachable by voice.

2. Permitted use

- Use NAVA AI only on computers you own or are authorized to control.
- Respect the terms, privacy rules, and security requirements of applications and websites you use.
- Do not use NAVA AI to bypass authentication, access protected systems, or control another person’s computer without authorization.

3. Commands and actions

Voice commands can be misheard and a target can be ambiguous. Review visible choices before selecting them. You remain responsible for confirming destructive, sensitive, or externally visible actions.

4. Installation and updates

The installer creates a per-user installation and may add desktop or sign-in startup shortcuts when selected. Updates can change command coverage. Review the release notes and retain the published checksum for the release you install.

5. Disclaimer and liability

NAVA AI is supplied as-is to the maximum extent permitted by law. The project makes no promise that every app, website, device, microphone, or Windows configuration will work. To the extent allowed by law, the project is not liable for indirect loss, missed actions, data loss, or interruption caused by use of the preview.

6. Contact and changes

Source, releases, and issue tracking are available at github.com/ZahraRehmat/NavaAI. These terms may be updated with a future release.
